PROFESSIONAL SUMMARY

Electronics Engineering graduate (D3, GPA 3.44/4.00) with hands-on experience in microcontroller-based systems, IoT development, PLC programming, and electrical panel assembly. Proven ability to deliver embedded systems projects end-to-end — from hardware design to deployment. Certified Industry Automation Engineer (BNSP) with TOEIC 735/990.

KEY SKILLS

Programming	C/C++ (Arduino), Python (basic), HTML/CSS (basic)
Embedded / IoT	ESP32, Arduino, MQTT, Node-RED, Telegram Bot API
PLC & Control	PLC ladder logic, MDP panel wiring & assembly
PCB Design	KiCad / EasyEDA — schematic to layout
Instruments	Oscilloscope, multimeter, function generator, power supply
Software	Microsoft Office (Word, Excel), Git (basic)
Language	Indonesian (native) English — TOEIC 735/990 (valid Oct 2026)

WORK EXPERIENCE

PT. Sigma Global Innovation — Electronics & IoT Engineer (Freelance) *Oct 2025 – Present*

- Designed and assembled MDP (Main Distribution Panel) systems including component selection and wiring per electrical safety standards.
- Performed on-site installation and commissioning of electrical panels, ensuring correct operation prior to handover.
- Developed and deployed multiple IoT projects using ESP32/Arduino for remote monitoring and device control via MQTT and Telegram Bot.

PT. Jasa Teknik Indonesia — K3 Engineering Intern *Sep – Dec 2024*

- Assisted senior K3 specialists in conducting equipment inspections and safety testing across industrial facilities.
- Maintained accurate inspection records, reports, and compliance documentation.

Itqon Computindo — Computer Technician Intern *Sep – Nov 2021*

- Diagnosed and repaired hardware faults on PCs, laptops, and printers.
- Installed OS, drivers, and applications; managed spare-parts inventory and maintenance logs.

TECHNICAL PROJECTS

Barcode Scanning & PLC-Based Goods Distribution System — 2025

- Built a conveyor-based sorting system controlled by PLC ladder logic; barcode scanner triggers relay outputs to route items to the correct rack.
- Integrated proximity and barcode reader inputs with PLC I/O; validated reliability under repeated cycle testing.

IoT Water Quality Monitor (pH & Turbidity) via Telegram — 2024

- ESP32-based system reading pH and turbidity sensors; pushed data to Telegram Bot with configurable alert thresholds.

- Designed custom PCB for sensor signal conditioning; validated accuracy against calibrated reference instruments.

IoT Vital Signs Monitor (Temperature, Heart Rate, SpO2) — 2024

- Integrated MAX30102 and MLX90614 sensors with ESP32; streamed real-time data to a web dashboard over Wi-Fi.

ORGANIZATION & COMPETITION

Polines Robotic Evolution — Programmer — ABU Indonesia Robot Contest 2024 – 2025
Division

- Sole programmer for the national ABU Robot Contest; responsible for full robot software architecture.
- Implemented motion control, sensor fusion, and competition strategy algorithms.

CERTIFICATIONS

BNSP — Industry Automation Engineer Aug 2024 – Aug 2027

Indonesian Professional Certification Authority | Competencies: PLC Operation, Electrical Equipment Maintenance, Electrical System Assembly, Pneumatic Equipment Maintenance

TOEIC Listening & Reading — Score 735 / 990 Oct 2024 – Oct 2026

ETS (Educational Testing Service) | Listening: 435 | Reading: 300

EDUCATION

Politeknik Negeri Semarang (POLINES) 2022 – 2025

D3 — Electronics Engineering | GPA: 3.44 / 4.00

SMK Palapa Semarang 2019 – 2022

Vocational — Computer & Network Engineering
